

DrupalCon 2025

Paragraphs and Single Directory Components: A Dynamic Duo

Michele Smolensky

Lead Developer @ Chromatic

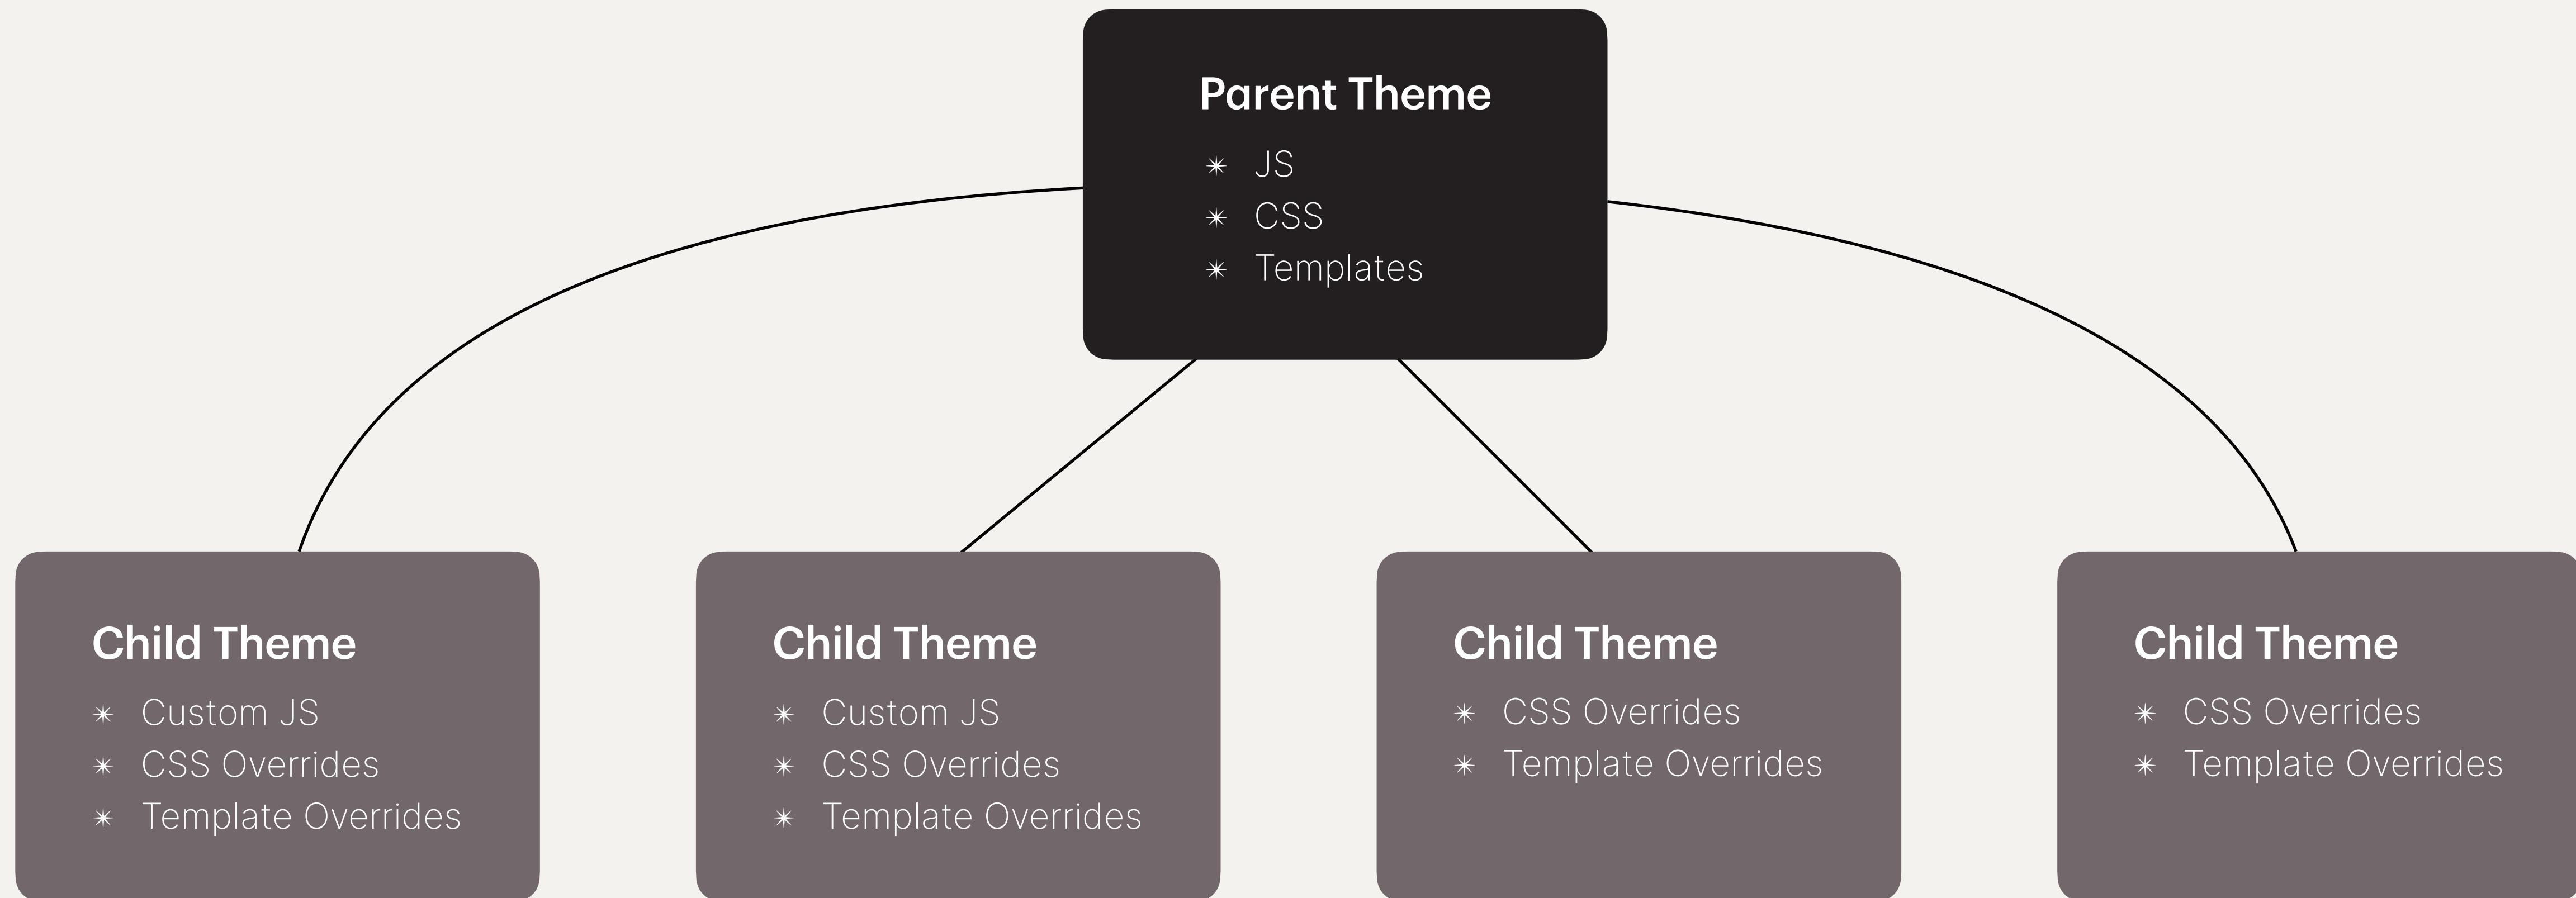

Märt Matsoo

Senior Developer @ Chromatic

Project Rundown

Pros of the Approach

1. Reduced maintenance costs & upkeep
2. Reusable components for editors via Paragraphs
3. Scalable, reliable, and stable
4. Shared config for all child sites

Cons of the Approach

1. Scalability still an issue
2. Doesn't go far enough to reduce maintenance costs
3. Lack of an ethos/standards to the coding
4. Difficult to manage which Paragraphs had styles (or not) from site to site.
5. No easy way to preview components

Effort & Investment

	Task	Effort
1	Discovery & Prototyping	L
2	Designs	M
3	Update Paragraphs	XL
4	Consolidating Templates	M
5	SCSS to CSS Transition	XXXL
6	Component Library	XL
7	QA	XXXL
	Total	\$\$\$\$

10 - 14

months

Single Directory Components

What is an SDC?

Rendered welcome component

Welcome to the SDC Library!

Have fun playing with the SDC Library!

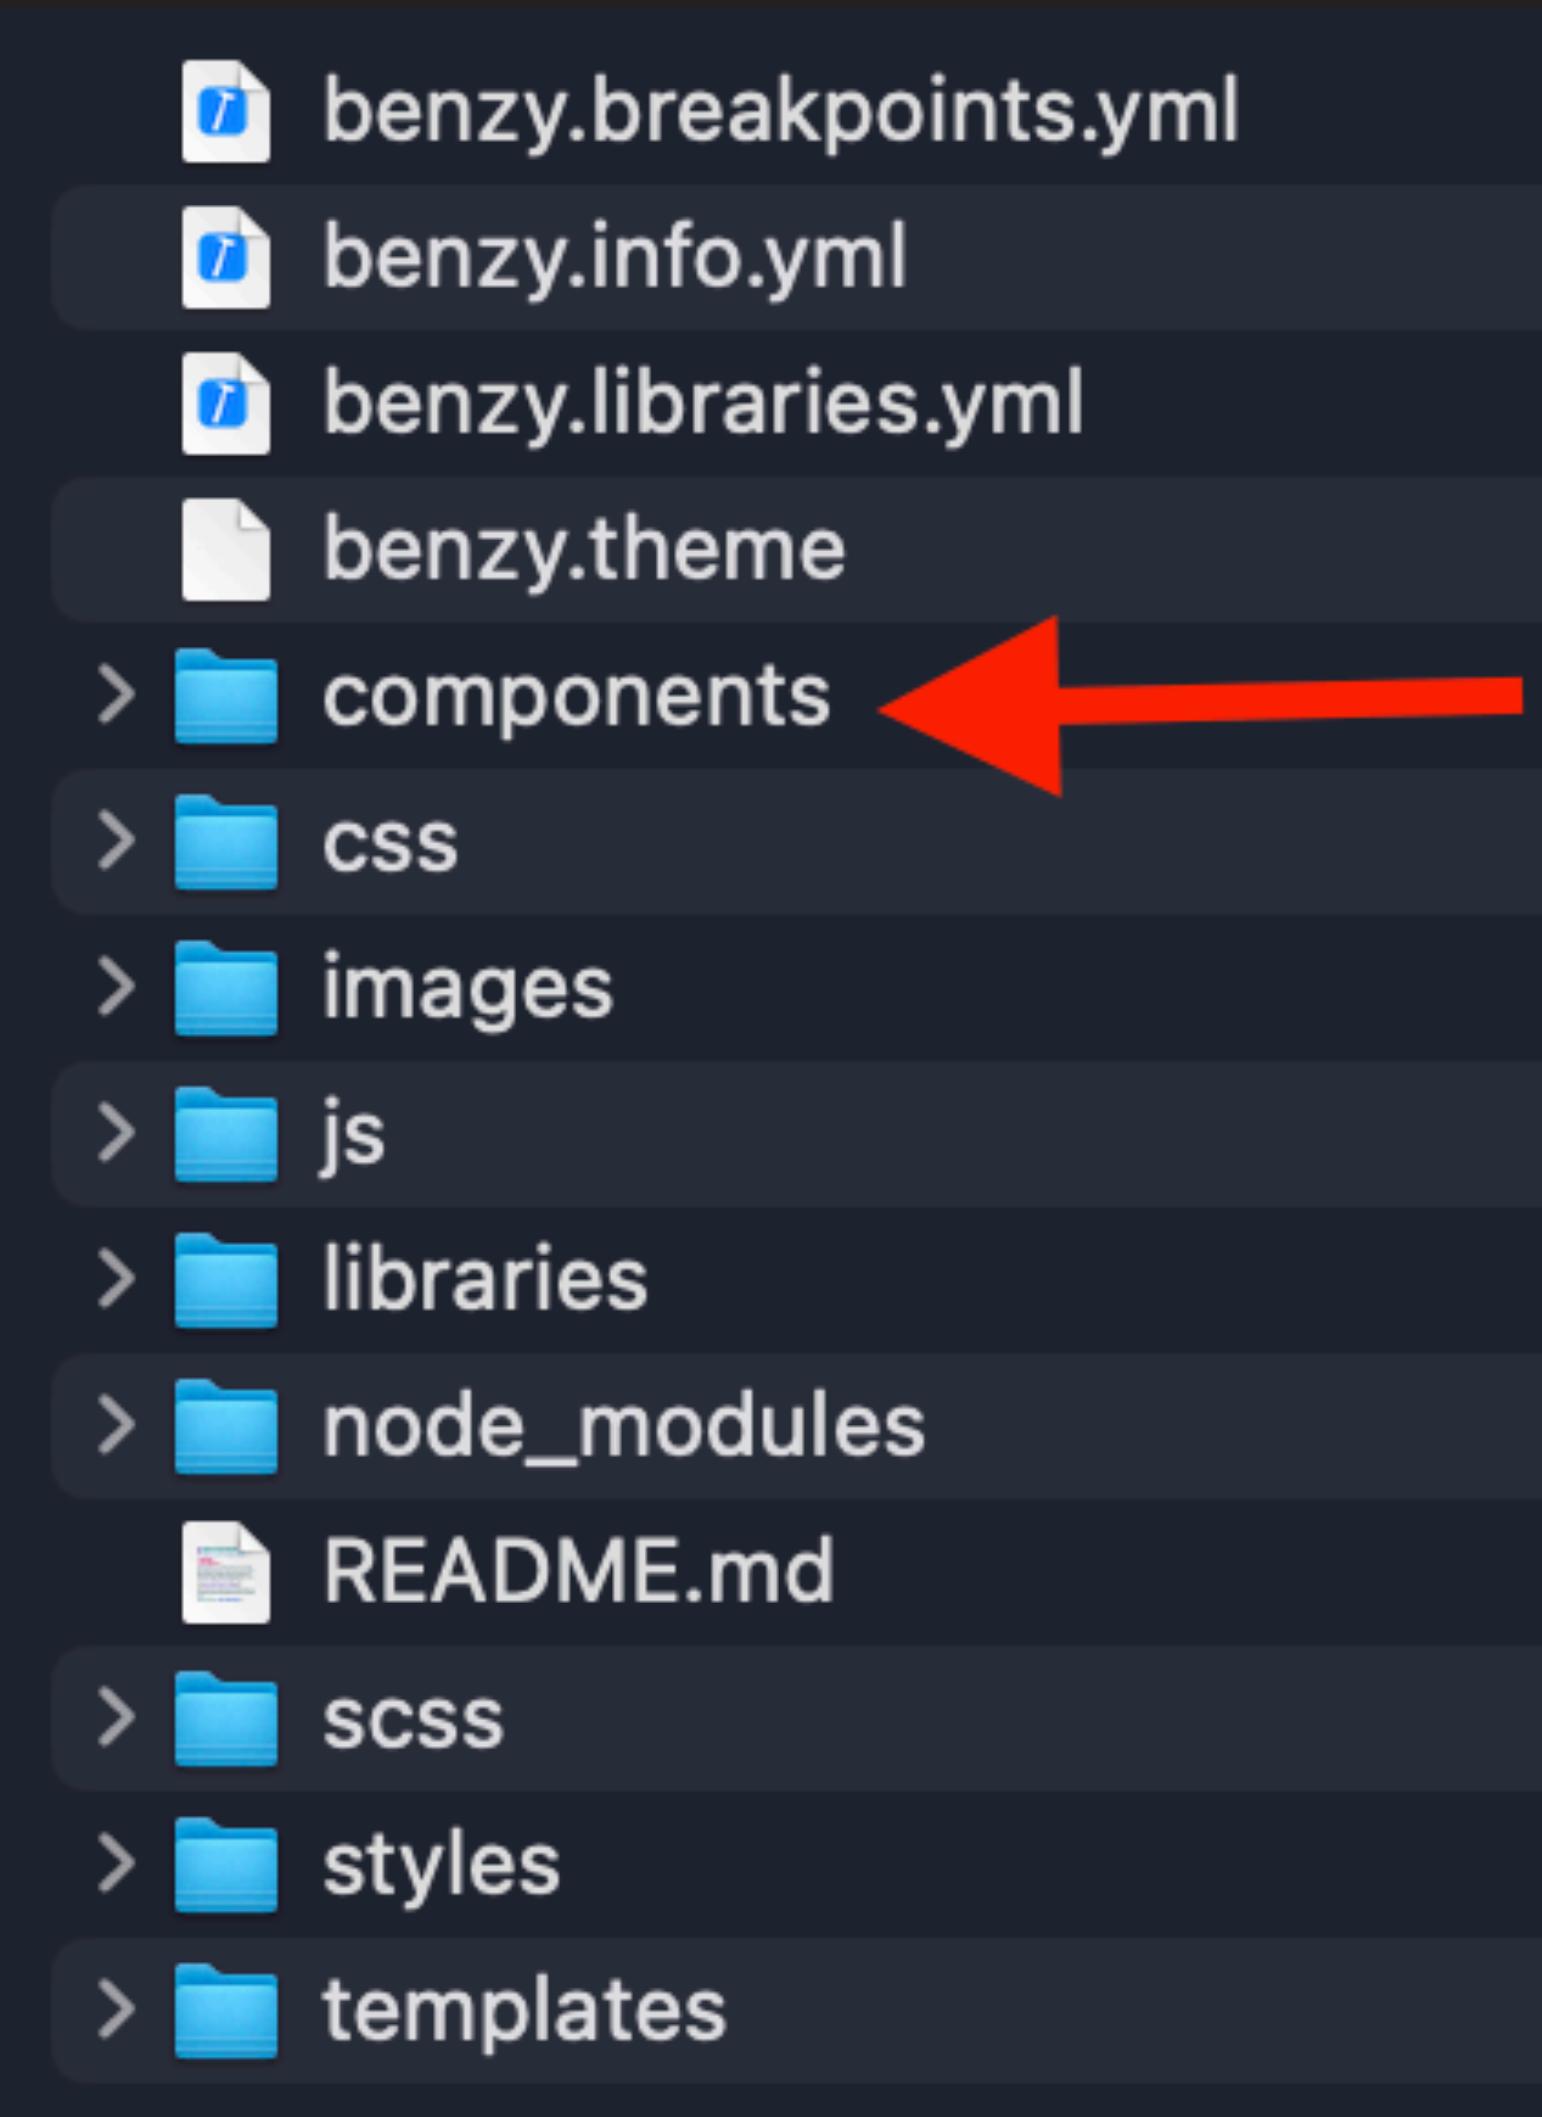

Enumerated list example (using colors)

blue

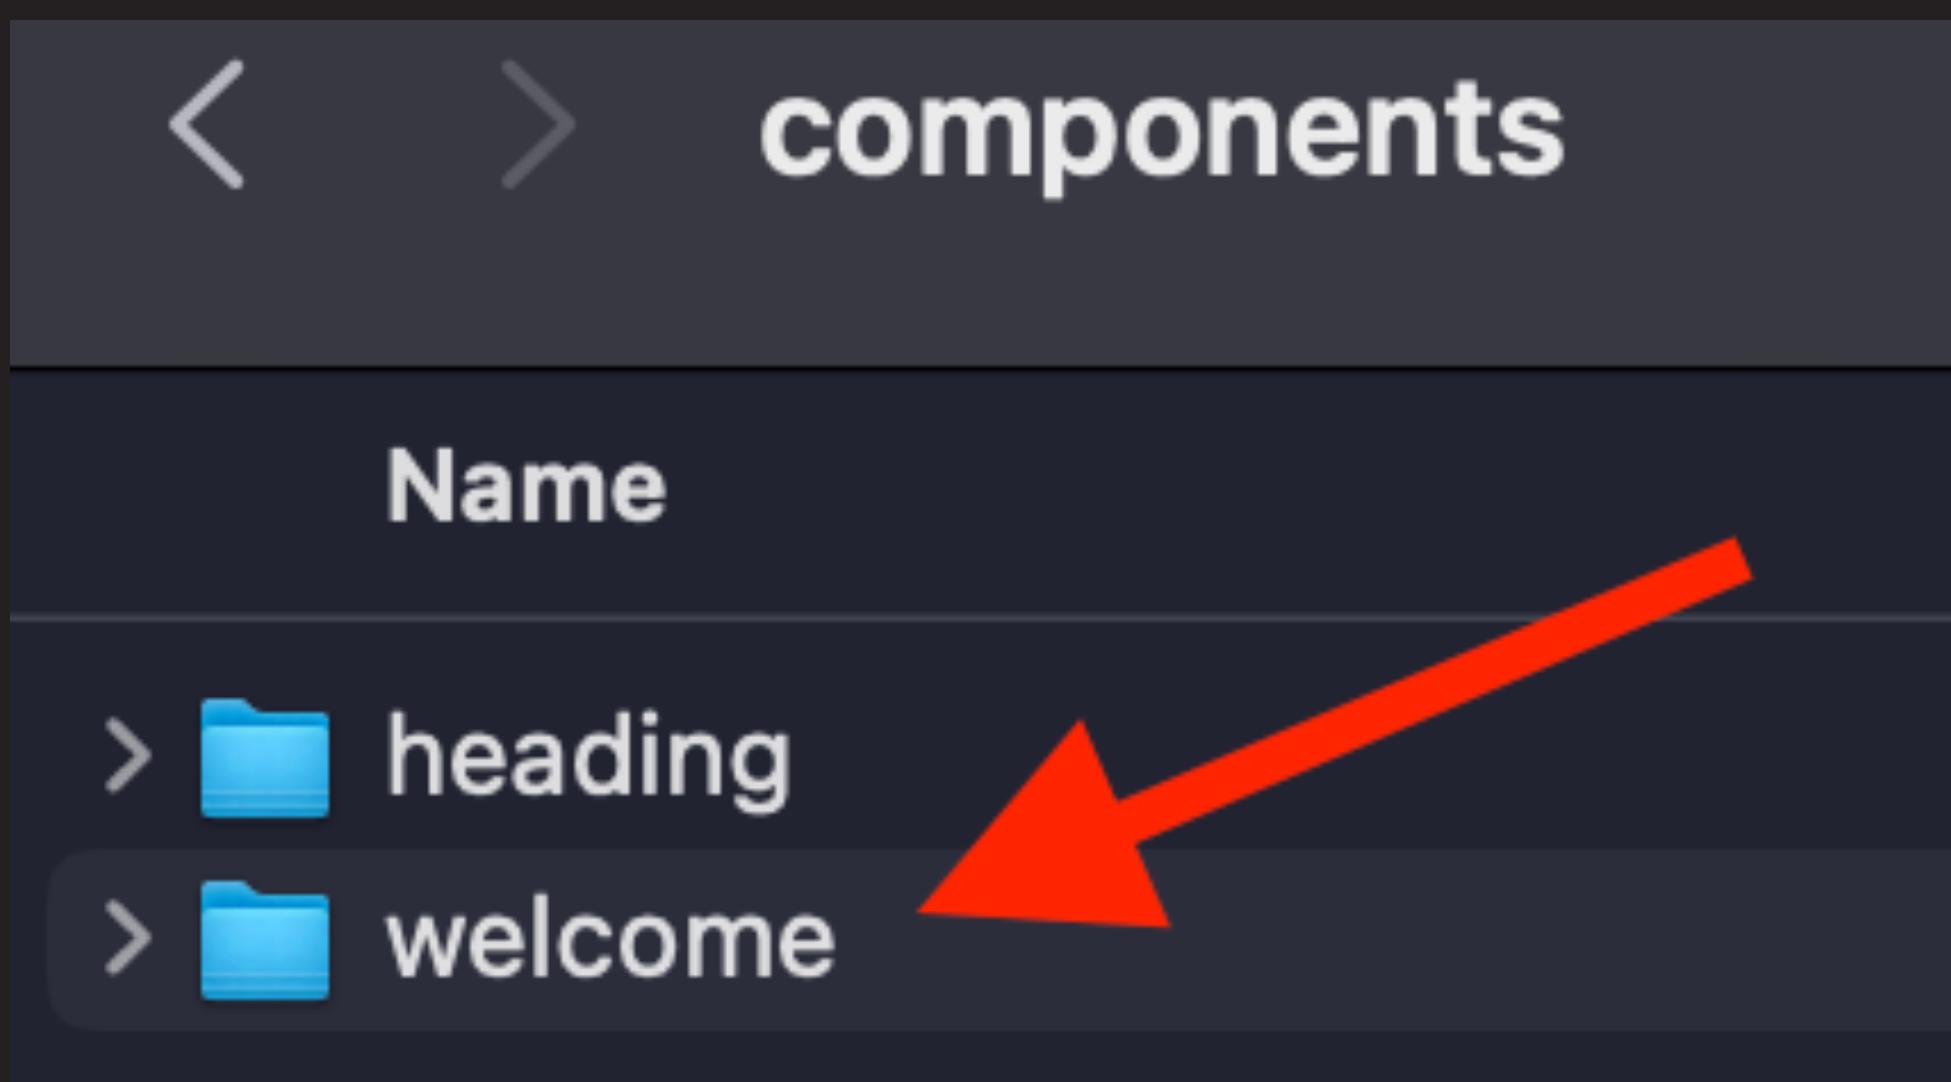

Integer example

3

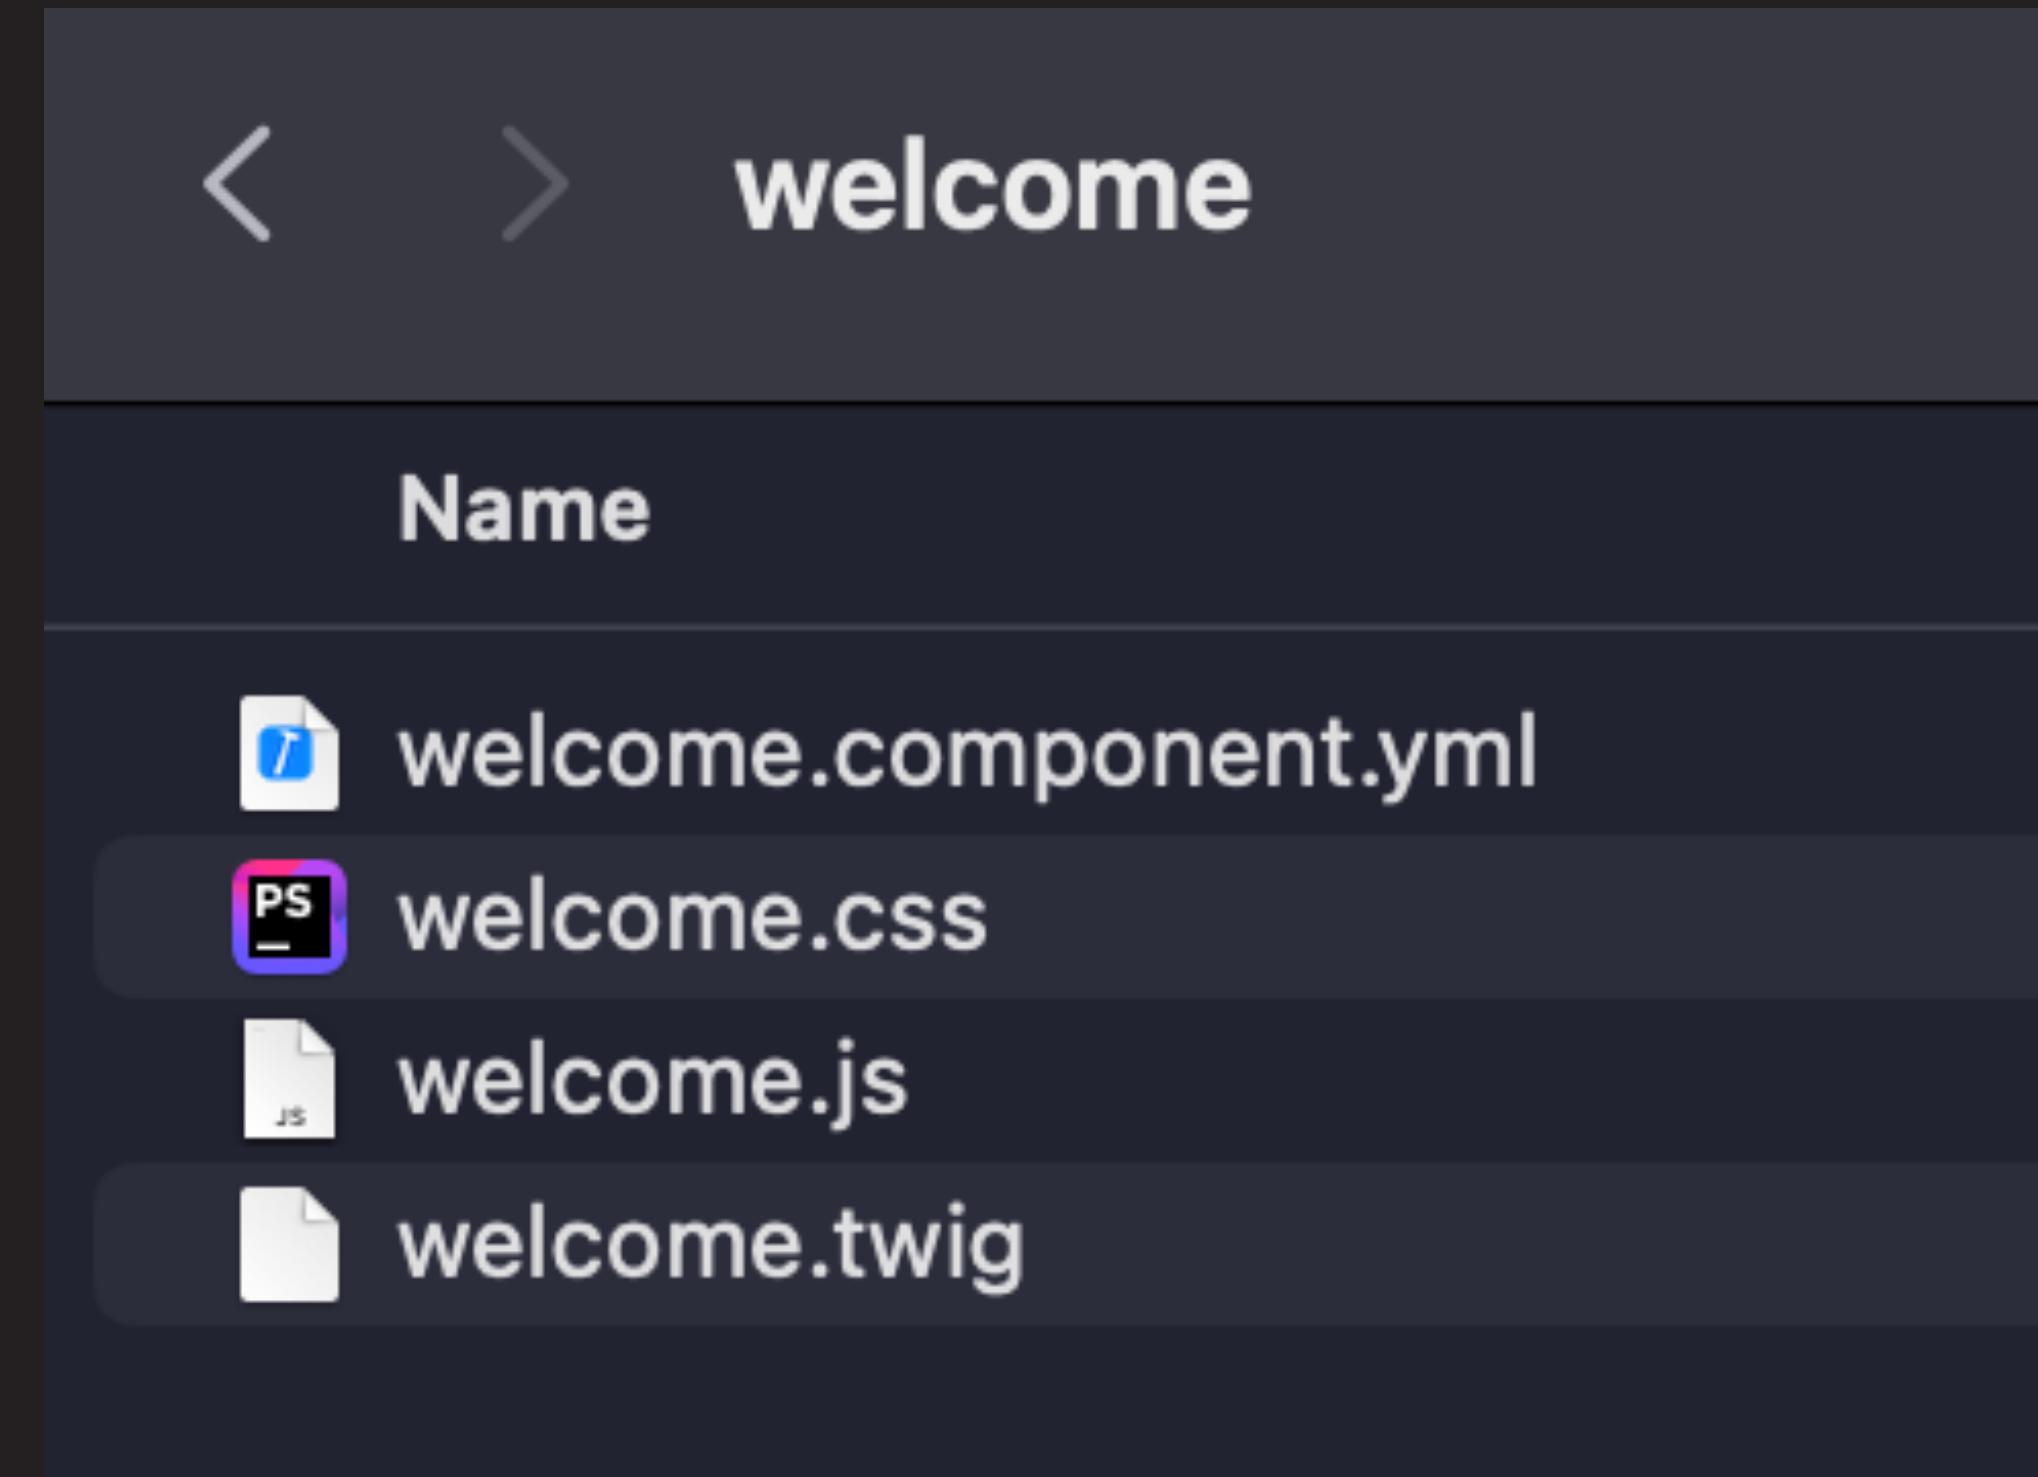

A theme called “Benzy”

The “Benzy” theme’s “components” folder

The “welcome” component

welcome.component.yml

```
1 $schema:  
  https://git.drupalcode.org/project/drupal/-/raw/10.1.x/core/modules/sdc/src/metadata.schema.json

Paragraphs & Single Directory Components

Paragraphs + SDC

The “WHY”

- Paragraphs are already like components—for the site editor experience
- And SDC are...well...components!

Paragraphs + SDC

The “HOW”

- Passing Paragraph data as Props
- Passing Paragraph data as Slots

```
19 name: Hero
20 group: Benzy
21 props:
22   type: object
23   properties:
24     title_treatment:
25       type: string
26       title: Title treatment
27       description: Default setting is 'Single Title' or 'inline'.
28       Translatable and optional.
28     enum:
29       - width--inline

15  }  
16 }
```

[child-theme]/child-theme.info.yml

```
12 ...
13 libraries-extend:
14   core/components.benzy--hero:
15     - child-theme/hero
```

CSS over SCSS

Why sunset SCSS?

- Modern CSS has improved a lot since SCSS was created.
- No need for a compiler or watcher
- FE Devs no longer reinventing the wheel
- Using SDC, we can load CSS as needed.

Takeaways

Project Results

Technical Improvements

- Paragraphs and SDC work great together!
- Developed 36 new foundational components
- Reduced client theme templates by 57% and counting
- Transitioned over $\frac{1}{3}$ of styles to pure CSS
- Reduced amount of CSS that loads per page

Project Results

Workflows

- Increased alignment between site editors, designers, and developers.
- Improved new site onboarding process.
- Improved documentation for available components per site.

Project Results

Component Library

- SDC Library contrib module
- SDC Library Paragraphs submodule
- Actually has been used for its intended purpose!

composer require 'drupal/sdc_library:^1.0@alpha'
